

UTS Pengembangan Perangkat Lunak Berbasis Layanan (A)

****Nama:**** Raden Mas Said Baariq

****NIM:**** 2210511057 (Studi Kasus 7: Kepegawaian & Absensi)

 Link Penting

• ****Demo Video (YouTube):**** <https://youtu.be/FcybzOmB-tA>

• ****Repository:**** <https://github.com/SeoHacka/uts-pplos-a-057>

 Arsitektur Sistem

Sistem ini menggunakan ****Service-Oriented Architecture (SOA)**** yang terdiri dari:

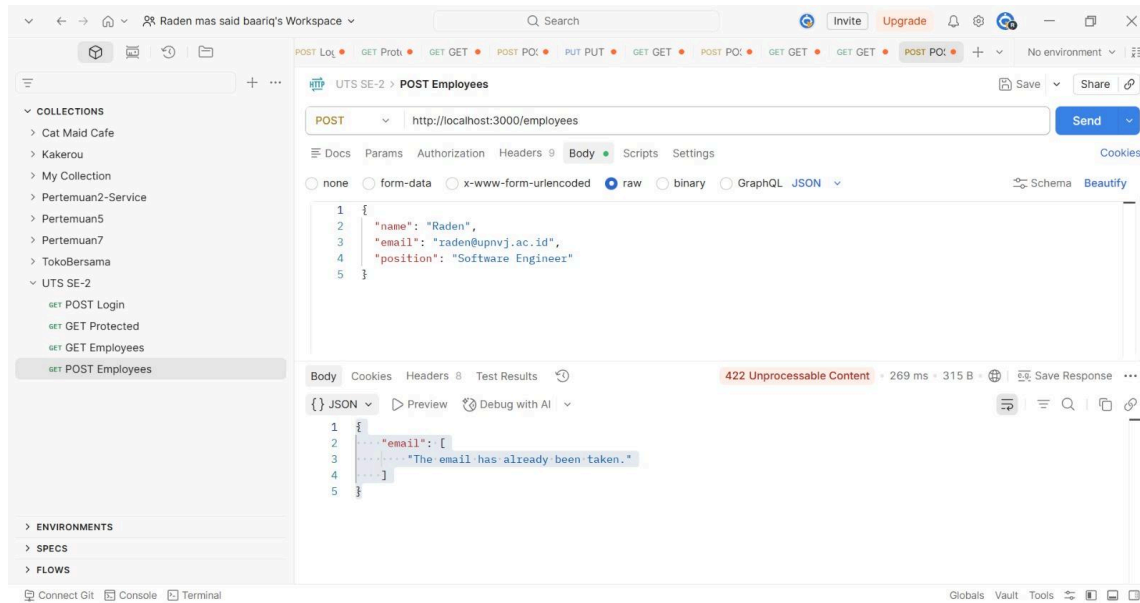

1. ****API Gateway (Node.js):**** Port 3000 - Entry point tunggal untuk konsolidasi service.
2. ****Auth Service (Node.js):**** Port 4000 - Menangani JWT Login & OAuth GitHub.
3. ****Employee Service (Laravel 11):**** Port 8000 - CRUD Pegawai dengan Pagination & Filtering.
4. ****Attendance Service (Node.js):**** Port 5000 - Pencatatan kehadiran real-time.

 Cara Menjalankan Project

1. Clone repository ini.
2. Jalankan ``npm install`` di folder gateway, auth, dan attendance.
3. Jalankan ``composer install`` & ``php artisan migrate`` di folder employee-service.
4. Jalankan masing-masing service di terminal terpisah.
